CSE- Academic Year 2026-27

Java Programming – Lab Batch 2025-29

Lab Assignment No:- 17	
Name of Student	**Arhaan Hussain Khan**
PRN No.	**25070122045**
Batch	**A-2**
Class	**Second Year**
Academic Year & Semester	**26-27 & 3rd Sem**
Date of Submission	30/8/2026
Title of Assignment:	**Write a Java program to demonstrate the use of Swing and Applets**

Practice questions
 	
Output Screenshots Solve questions on given link and attach screen shot of leetcode with your login and o/p
	1. Create a simple Student Registration Form GUI using Swing
	
	import javax.swing.*;
	
	import java.awt.*;
	
	public class StudentRegistrationForm {
	
	public static void main(String[] args) {
	
	JFrame frame = new JFrame("Student Registration Form");
	
	JLabel nameLabel = new JLabel("Name:");
	
	JLabel rollLabel = new JLabel("Roll No:");

```
        JLabel courseLabel = new JLabel("Course:");
        JLabel genderLabel = new JLabel("Gender:");

        JTextField nameField = new JTextField();
        JTextField rollField = new JTextField();

        String[] courses = {"CSE", "IT", "ECE", "Mechanical"};
        JComboBox<String> courseBox = new
JComboBox<>(courses);

        JRadioButton male = new JRadioButton("Male");
        JRadioButton female = new JRadioButton("Female");

        ButtonGroup genderGroup = new ButtonGroup();
        genderGroup.add(male);
        genderGroup.add(female);

        JButton submit = new JButton("Submit");

        frame.setLayout(new GridLayout(5, 2, 10, 10));

        frame.add(nameLabel);
        frame.add(nameField);
        frame.add(rollLabel);
        frame.add(rollField);
        frame.add(courseLabel);
```

```
        frame.add(courseBox);
        frame.add(genderLabel);

        JPanel genderPanel = new JPanel();
        genderPanel.add(male);
        genderPanel.add(female);
        frame.add(genderPanel);

        frame.add(new JLabel());
        frame.add(submit);

        submit.addActionListener(e -> {
            JOptionPane.showMessageDialog(frame,
                    "Registration Successful!");
        });

        frame.setSize(450, 300);
        frame.setDefaultCloseOperation(JFrame.EXIT_ON_CLOSE);
        frame.setVisible(true);
    }
}
```

2. Create a simple Employee Registration Form using Java Swing GUI that takes employee details such as Employee ID, Name, Department, and Salary. Display the entered information in a dialog box

```
import javax.swing.*;
import java.awt.*;

public class EmployeeRegistration {
   public static void main(String[] args) {
      JFrame frame = new JFrame("Employee Registration Form");

      JLabel idLabel = new JLabel("Employee ID:");
      JLabel nameLabel = new JLabel("Name:");
      JLabel deptLabel = new JLabel("Department:");
      JLabel salaryLabel = new JLabel("Salary:");

      JTextField idField = new JTextField();
      JTextField nameField = new JTextField();
      JTextField deptField = new JTextField();
      JTextField salaryField = new JTextField();

      JButton submit = new JButton("Submit");

      frame.setLayout(new GridLayout(5, 2, 10, 10));

      frame.add(idLabel);
      frame.add(idField);
      frame.add(nameLabel);
      frame.add(nameField);
```

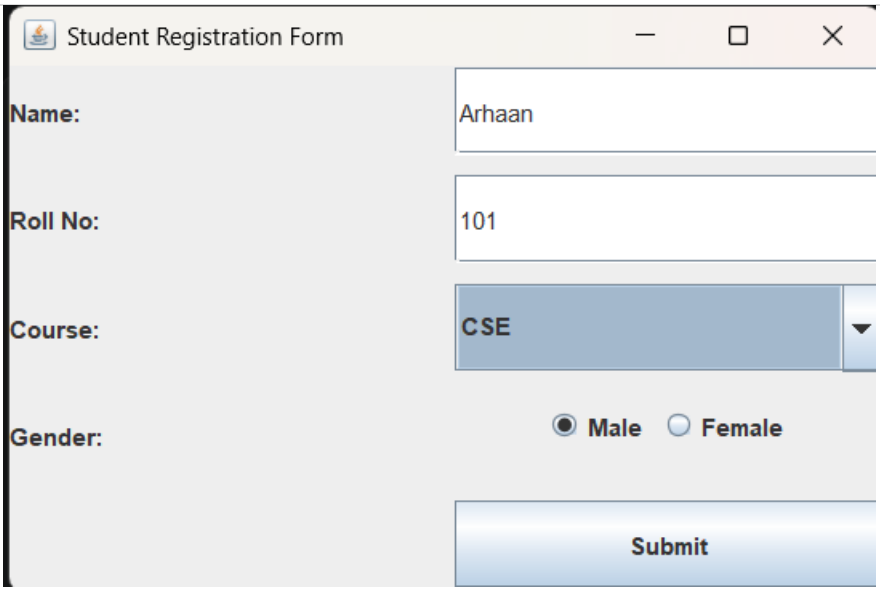

```
        frame.add(deptLabel);
        frame.add(deptField);
        frame.add(salaryLabel);
        frame.add(salaryField);
        frame.add(new JLabel());
        frame.add(submit);

        submit.addActionListener(e -> {
            String details = "Employee ID: " + idField.getText()
                    + "\nName: " + nameField.getText()
                    + "\nDepartment: " + deptField.getText()
                    + "\nSalary: " + salaryField.getText();

            JOptionPane.showMessageDialog(frame, details,
                    "Employee Details",
JOptionPane.INFORMATION_MESSAGE);
        });

        frame.setSize(400, 300);
        frame.setDefaultCloseOperation(JFrame.EXIT_ON_CLOSE);
        frame.setVisible(true);
    }
}
```

Output Screenshots (if applicable)

Conclusion	The program successfully demonstrates the use of Java Swing to create an Employee Registration Form. It accepts employee details such as Employee ID, Name, Department, and Salary, and displays the entered information in a dialog box using JOptionPane.
